

Andy Rafael Domínguez-Monterroza

ardominguezm@gmail.com
<https://ardominguezm.github.io>

Education

Universidad Complutense de Madrid (UCM), Spain 2021–Present
PhD in Mathematical Engineering, Statistics & Operations Research (expected 2026)
Thesis: Topological and Geometric Approaches to Complex Network Analysis
Supervisors: Prof. Alfonso Mateos-Caballero (UPM), Prof. Antonio Jiménez-Martín (UPM)
Universitat de les Illes Balears, Spain 2016
MSc in Applied Mathematics and Advanced Physics
Universidad Nacional de Colombia 2011
BSc in Mechanical Engineering

Research Interests

Topological Data Analysis with Machine Learning (persistent homology)
Discrete Differential Geometry (Ricci curvature on graphs, curvature flows)
Random Matrix Theory and spectral analysis of high-dimensional systems
Statistical physics of complex systems (multifractality)
Topological and geometric methods in time series, networks, and biological signals.

Selected Publications

Research Experience

PhD Researcher, UCM and UPM

2021–Present

- Developed theoretical and computational methods combining persistent homology, Ricci curvature, and random matrix theory.
- Published in top journals across applied mathematics, physics, and biomedical signal analysis.
- Independent research on visibility graphs, multifractal analysis, nonlinear dynamics, and geometry of images/signals.

Teaching Experience

Assistant Professor and Director of the Data Science Program

Universidad Tecnológica de Bolívar, Cartagena de Indias, Colombia

2019–2024

Courses taught: Linear Algebra, Probability, Inferential Statistics, Time Series Analysis, Machine Learning, Introduction to Data Science.

Lecturer (several institutions in Colombia)

2015–2019

Courses taught: Probability, Stochastic Processes, Differential Calculus, Linear Programming, Precalculus.

Awards and Fellowships

- Banco Santander Ibero-American Scholarship (2016).
- Best Undergraduate Thesis Award, Universidad Nacional de Colombia (2011).

Service

- Peer reviewer for: *Biomedical Signal Processing & Control* (Elsevier), *Chaos Solitons & Fractals* (Elsevier), *Computational Economics* (Springer-Nature)
- Co-organizer of the Economics & Data Science Seminar (UTB- Central Bank of Colombia, 2024).

Skills

Python, R, MATLAB; persistent homology (GUDHI, Ripser), Ricci curvature (GraphRicciCurvature), advanced numerical linear algebra.
